

# SERGEY DMITRIEV

FRONT-END DEVELOPER

## Portfolio

<https://davra.cz/>

## Profile

My name is Sergey Dmitriev and I enjoy challenges. One of my biggest dreams was programming. I spent much time and made efforts just to get every opportunity to study this subject. I have the greatest respect for the profession such as a programmer. Programming helps people to fight cancer, predict car accidents, Furthermore, I strongly believe that programming is vital to the modern world. There are many reasons for my decision to start coding, but the main point is – I do love it and I strongly believe, that I can help this world, using my skills.

## Experience

### Front-end developer

ING Bank | 1/4/2020 - Present

Started this project as a front-end developer. I was responsible for a ING Bank main web: [ing.cz](http://ing.cz). My key role was to implement Polymer.js library in an already existing web-site. The next goal was in optimising polymer build output using Rollup.js builder.

The full list of my responsibilities:

- Implementing Polymer library
- Optimisation of build outputs
- Developing and testing polymer components
- Preparing technical documentation for components
- Developing new responsive pages, banners, and other templates
- Implementing and testing templates in cooperation with foreign teams
- Debugging & refactoring old code, and providing code review to other members of team

Consulting with DevOps engineer while migrating to Azure DevOps.

### React developer

Generali CEE Holding | 1/4/2019 - 31/3/2020

Started as junior React developer. My role was in fixing bugs, writing end-to-end tests and preparing technical documentation. I was a part of a small agile team of 12 people.

Next quarter I become sole developer who was supporting and developing new features, refactoring old code, preparing monthly releases managing different versions of application on development, pre-production and production environments.

During merging of Generali insurance and Česká pojišťovna insurance I was sole developer who was responsible for merging two front-end sides in one crm system for a new Generali Česká pojišťovna insurance.
